Professional Lustre[®] Lawn[™] Fertilizer 12-24-12 With Siduron

Net Wt. 50 Lbs. (22.7 kg.)
Treats Up to 15,000 Sq. Ft.

General Information

Lustre Lawn 12-24-12 with Siduron is a combination of the proper nutrients to use on newly seeded turf or on established turf where overseeding and a pre-emergence herbicide is required. The high phosphorus content provides the nutrient most needed for seedling development and at the same time, will supply enough nitrogen and potash for initial plant growth. At the recommended rates, this product will control annual weed grasses such as crabgrass, foxtail and barnyard grass in newly seeded bluegrass, perennial ryegrass and fescue lawns.

When and How to Use

Apply to turf in the Spring, prior to expected annual weed grass seed germination. Apply 3.3 pounds per 1,000 sq. ft. in newly seeded areas as the last step before watering. For established turf, apply at 6.6 pounds per 1,000 sq. ft. At least one-half inch of water should be provided within three days of treatment.

This product is hazardous and should be kept out of the reach of children. Consult the bag label for detailed use and precautionary information.
